USE OF STAVE REMNANTS JOINED TOGETHER	
OPTIMIZED WOOD CUTTING TECHNIQUE = SAVE MORE RAW MATERIAL	
FRENCH OAK	ALLOWS US TO RECOVER AN ADDITIONAL 3% OF THE WOOD

ADVANTAGES LINKED TO THIS ASSEMBLY PROCESS

MORE **MICRO-OXYGENATION** THANKS TO THE **TONGUE AND GROOVE** TECHNIQUE

- Highlights the fruit and volume in the mouth
- Optimization of the colloidal stability
- Early elimination of reductive aromatic notes
- Reduced maturing period

ZOOM

A SPECIFIC CUTTING PROCESS

UNIQUE ASSEMBLY TECHNIQUE

ECO 3 is a blend of irregularly sized staves which are joined together using our patented Tongue and groove™ technique (staves of smaller width, standard thickness, respect of the wood fiber). Two of this type of stave are required to make a standard sized stave.

ECO

THE RANGE OF BARRELS FOR SUSTAINABLE DEVELOPMENT

During traditional stave milling, adhering to the normal technical constraints leads to a 70% loss of raw material. The Vicard Group transforms 100% of these losses into a range of products.

The ECO  barrel range plays a role in this, enables us to offer quality barrel at competitive prices.

PRODUCT BENEFITS		IDEAL FOR SHORT OR MEDIUM LENGTH MATURATION
